

## PRODUCT QUESTIONNAIRE

### Heating cable – heating tape

In order to determine a special product made to the measurements you require, answers to the following questions are necessary, These will be used to define the best product you need.

Please fill in the following questionnaire and send it back to [flexelec@omerin.com](mailto:flexelec@omerin.com)

**Company: :**

**Name :**  **Given name :**

**Tel :**

Total heating length circuit in mm :

Cold tail length n mm :

Total power in Watt:

Voltage in Volt :

External diameter in mm :

Insulation material of the heating part

Silicon elastomer : most common

PVC : for low power

Fiberglass : only for specific application

External braid

Without braid

Tinned copper

Stainless steel

Fiberglass : only for specific application

Number of power cable

1 cable at one side

2 cables at one side.

Connection type between heating and cold part

Heat shrink sheath

Moulding

Quantity of your needs (in unit) per delivery :

Others information and sketch if needed :
