FCHK

Heating belts for refrigeration compressors with integrated thermostat

Characteristics

- Quick, safe and easy to fit.
- Sealed silicon insulated heating element.
- Metal braid for earthing.
- Voltage 230 V as standard.
- Integrated thermostat.
- Patented product.
- Special production on request.
- Ingress protection code : IP54

Applications

FCHK heating belts are fitted to refrigerating compressors to prevent the coolant from being absorbed by the oil.

The lower the temperature, the quicker and the more complete the absorption, which can seriously damage the compressor, especially when starting up, through lack of lubrication.

The integrated thermostat on the crankcase heater makes it completely autonomous.
