

PRINCE MEDICAL
DEVICES

Manufacturer of Medical Devices

**DIGESTIVE & BRONCHIAL
ENDOSCOPY**

PRINCE MEDICAL

DEVICES

3 production sites
in France and Tunisia
10,000 m² of floor space
including 3,000 m² in clean rooms
15 million products manufactured per year

The regulatory expertise
of PRINCE MEDICAL makes it possible to
respond perfectly to current standards
and to anticipate their evolution. PRINCE
MEDICAL has a long experience in
product registration in a number of interna-
tional markets

PRINCE MEDICAL, certified NF EN ISO 13485, designs and manufactures single-use medical devices for Gastroenterology, Gynaecology and Medically Assisted Reproduction.

With nearly 30 years of expertise in the healthcare market, the company can rely on technical know-how in the extrusion of thermoplastics and polymers, and has state-of-the-art equipment to meet the needs of markets with demanding applications.

Perfect control of all industrial processes (*moulding, extrusion, production of latex and silicone balloons, assembly of plastic material and steel components, laser cutting, ultrasonic and laser welding, marking, packaging, sterilisation, etc.*) is a guarantee of the high level of quality of PRINCE MEDICAL products.

PRINCE MEDICAL is a subsidiary of the international OMERIN Group and benefits from the dynamism of its 1,700 employees.

PRINCE MEDICAL offers a wide range of sterile Class IIb, Class IIa, Class I sterile and non-sterile medical devices, mainly intended for:

- **Gastroenterology:** balloons catheters, injection needles, cleaning brushes for endoscopes, etc.
- **Gynaecology:** gynaecological forceps (Cheron forceps, Pozzi forceps, etc.), speculums, histological swabbing probes, etc.
- **Medically Assisted Reproduction MAR:** embryo transfer catheters, intrauterine insemination catheter, puncture needle of oocytes, etc.

PRINCE MEDICAL also manufactures medical devices on behalf of its customers for use in urodynamics, anaesthesia, oxygen therapy, as well as external lines for infusion and injection of contrast media in radiology.

The company manufactures and packages its products in a controlled environment and has numerous grey and ISO7 and ISO8 classified clean rooms, guaranteeing a high level of product safety.

The **PRINCE MEDICAL** commercial and technical teams work with passion to put innovation, service and flexibility at the service of its customers.

2-LUMENS BALLOON CATHETER

QUICK EXCHANGE SYSTEM
Makes it easier to insert catheter
into echo-endoscope
AS2340720

**WELDED
DERIVATIONS**

**BONDED
DERIVATIONS**

TRANSPARENT TUBE
AS4460720

The **ENDOLINE® 2V-TRACT** 2-lumens balloon catheter enables the removal of gallstones and injection of contrast material or any other medicated substance into the bile ducts. This medical device is intended mainly for persons with hepatic colic following the appearance of gallstones.

ADVANTAGES

- Product compatible for use with the main endoscopes on the market.
- Radiopaque.
- Standard connector for connecting a syringe for contrast medium injection.
- Presence of a stainless steel ring and stainless steel ligatures on the balloon reinforcing the radiopacity of the distal part for better balloon localisation.
- Facilitates catheter insertion and exchange when used with a duodenoscope.

ADDITIONAL ACCESSORIES

The balloon catheter can be used with the **ENDOLINE® Y-TRACT** Y-clamp fitting. Provides practitioners with 2 injection ports on balloon catheters with a single injection port. It also enables the fixation of the guide wire after catheter placement.

ENDOLINE® NASO-KIT

18

NASOBILIARY KIT

The **ENDOLINE® NASO-KIT** nasobiliary kit enables the aspiration of bile or pancreatic juices. This medical device is intended primarily for persons with obstructive jaundice, acute cholangitis or extrahepatic cholestasis.

NASOBILIARY KIT COMPONENTS (components can be sold separately)

- A nasobiliary catheter for aspirating bile juice.
- A Luer-Lock connector mounted on the nasobiliary catheter enabling biliary or pancreatic juice aspiration. It connects the nasobiliary catheter to the full extension.
- A full extension to drain bile or pancreatic secretions in an external receiving bag or to rinse the catheter as needed.
- A nasal tube to retrieve the nasobiliary catheter in the larynx and to remove it through the nose.

ADVANTAGES

- Axial and lateral perforations in the distal part allow for efficient drainage of the hepatobiliary tract.
- Easy to position catheter in the bile ducts thanks to the radiopaque distal end (with gold ring).

ENDOLINE® NASO-EXTEND

22

FULL EXTENSION

The **ENDOLINE® NASO-EXTEND** full extension drains bile or pancreatic secretions into an external receiving bag, and can also be used to rinse the nasobiliary catheter. This single use medical device is part of the **ENDOLINE® NASO-KIT** nasobiliary kit (for more information on the kit, please consult the data sheet page 18).

It has a 3-ways stopcock:

- 1 way to the patient, which is connected to the proximal end of the nasobiliary catheter via the Luer-Lock connector.
- 1 way for rinsing of the nasobiliary catheter, when required.
- 1 way to collect bile in an external receiving bag.

TIP

METAL
TIP

The ENDOLINE® 1V-JECT 1-way injection needle has been designed specifically and exclusively for haemostasis of gastrointestinal haemorrhages, sclerosis of oesophageal varices and inflating and marking polyps.

The needle is only suitable for use with flexible endoscopes.

ADVANTAGES

- Radiopaque distal part visible on the screen, for models with a metal tip.
- Ergonomically shaped handle for easy manipulation.
- Product compatible for use with the main endoscopes on the market.
- Luer-Lock connector for connecting a syringe for product injection

AVAILABLE HANDLES

1.0

The most widely used handle in the world, used and approved for over 20 years!

2.0

Evolution of the handle 1.0, thicker for a better grip in the hand.

3.0

Optimal ergonomics and lighter weight, this handle has been designed with the user and the environment in mind!

PRINCE MEDICAL
DEVICES

The ENDOLINE® 2V-JECT 2-ways injection needle has been designed specifically and exclusively for haemostasis of gastrointestinal haemorrhages, sclerosis of oesophageal varices and inflating and marking polyps.

The needle is only suitable for use with flexible endoscopes.

The 2nd way can be used to clean cleaning and/or rinse the procedure area.

ADVANTAGES

- Radiopaque distal part visible on the screen, for models with a metal tip.
- Ergonomically shaped handle for easy manipulation.
- Product compatible for use with the main endoscopes on the market.
- Luer-Lock connector for connecting a syringe for product injection.

AVAILABLE HANDLES

1.0
The most widely used handle in the world, used and approved for over 20 years!

2.0
Evolution of the handle 1.0, thicker for a better grip in the hand.

PRINCE MEDICAL
DEVICES

The **ENDOLINE® LOOP** polypectomy snare enables the resection of sessile/flat or pedicled polyps (≥ 6 mm) in the digestive tract via an upper or lower endoscopy. This snare is connected to the diathermy energy generator via the insert plug on the handle's movable slider.

ADVANTAGES

- Three fingers grip for easy manipulation.
- Radiopaque distal part for perfect visibility.
- Product compatible for use with the main endoscopes on the market.
- Connector for connection to a diathermic energy generator.

AVAILABLE FORMS

LARGE OVAL

Snare with flexible or rigid cable
Ø 30 x 50 mm

SMALL OVAL

Snare with flexible or rigid cable
Ø 15 x 25 mm

ENDOLINE® SPRAY

CATHETER SPRAY

33

The ENDOLINE® SPRAY catheter spray enables staining products to be injected into the digestive system's mucous membrane. This injection is used for mucosal analysis in case of lesions or polyps in the digestive system, in patients with a relevant medical history or for diagnosis purposes.

ADVANTAGES

- Easy one-handed operation.
- Product compatible for use with the main endoscopes on the market.
- Luer-Lock connector for connecting a syringe for injection of staining products.

ENDOLINE® VALVE

50

WORKING CHANNEL VALVE

VALVE WITH LATERAL
IRRIGATION FITTING

VALVE WITH LATERAL
IRRIGATION FITTING AND NON-RETURN VALVE

The **ENDOLINE® VALVE** working channel valve is a phosphorescent valve that fits on the endoscope's working channel. It gives accessories access to the working channel, guarantees a tight seal during the examination and eliminates the risk of cross-contamination between patients.

ADVANTAGES

- Narrow closure to prevent leakage.
- Product compatible for use with the main endoscopes on the market.
- References with trans-valve fitting connecting to commonly used syringe models.
- References with lateral irrigation fitting for lavage through the working channel while maintaining the accessory in place.
- References with integrated non-return valve to prevent gastric reflux in the endoscope.

ABOUT THIS MEDICAL DEVICE

1 st release date	2007
Single use	Yes
Class	Is
Sterile	Yes
Sterilisation method	Ethylene oxide sterilisation
Contains latex	No
Lifetime	5 years
Certification	CE
Packaging	Box of 50 or 100 units in individual sterile wrapping, depending on product reference
Storage	In its original box in a cool and dry place

CLEANBRUSH® KIT-4, KIT-5

64

CLEANING SWAB KIT – 4 OR 5 PARTS

The **CLEANBRUSH® KIT-4, KIT-5** swab kits are intended for cleaning the working channels, valves and valve cages of flexible endoscopes.

They are suitable for use with the main gastroscopes, colonoscopes, duodenoscopes, enteroscopes, bronchoscopes, cystoscopes, ureteroscopes, nephroscopes, hysteroscopes and naso-laryngoscopes on the market.

KIT COMPONENTS (SEE THE TABLE FOR THE DETAILED COMPONENTS BY REFERENCE)

- **CLEANBRUSH® ENDO**: cleaning brush for working channel
- **CLEANBRUSH® ENDO** (AN1055002, AN1055023, AN1056523): cleaning brush for the aspiration channel
- **CLEANBRUSH® ENDO** (AN1050123, AN1050138): cleaning brush for air/water channel, and/or Water Jet and/or balloon inflation channel
- **CLEANBRUSH® PISTON**: cleaning brush for valves, valve cages
- **CLEANBRUSH® EXO-B**: brush for external cleaning

ABOUT THIS MEDICAL DEVICE

1 st release date	1999
Single use	Yes
Class	I
Sterile	No (ethylene oxide decontamination)
Contains latex	No
Lifetime	5 years
Certification	CE
Packaging	Box of 25 or 50 units depending on product reference
Storage	In its original box in a cool and dry place
